Re: BAY AREA DRUM SITE

1212 THOMAS AVENUE - SAN FRANCISCO, CALIFORNIA

Dear Ms. Gan:

This will acknowledge receipt of the Department of Toxic Substances Control letter of March 9, 1992 requesting information regarding Kaiser Aluminum's past practices and business relationship with companies that operated the Bay Area Drum Site.

During the period 1948 to 1987, Kaiser Aluminum operated a number of facilities in the San Francisco Bay Area that could possibly have dealt with operators of the Bay Area Drum Site, including the following:

Approximate Period of Operation

1. Electrical Products 1937 Davis Street San Leandro, CA 94577

- 1962 1987
- 2. Aluminum Foil Packaging 177 South Airport Boulevard South San Francisco, CA 94082
- 1965 1978
- 3. Electrical Products (Bart Third Rail) 1967 1971 P. O. Box 759 (Former U.S. Army Installation) Benecia, CA 94510

4.	Can Manufacturing Plant 33280 Central Avenue Union City, CA 94587	1968 - 1983
5.	Modular Buildings/Warehousing 38505 Cherry Street Newark, CA 94560	1968 - 1982
6.	Can Development/Technical Service 1465 Factor Avenue San Leandro, CA 94577	1970 - 1983
7.	Refractories Laboratory 1600 South Main Street Milpitas, CA 95035	1943 - 1972
8.	Permanente (Magnesium, Aluminum Foil and Research & Development) 23333 Stevens Creek Boulevard Cupertino, CA 95014	1942 - 1990

All of the above described operations with the exception of the Permanente facility were shut down or sold as of the dates indicated. At Permanente, all manufacturing equipment has been sold and removed. Only one part-time caretaker employee remains at the facility.

Kaiser Aluminum has only a very limited number of records relating to operations of the above facilities prior to 1988. Most of the records that are available relate to real property ownership or leases, financial data, plant personnel, product testing, and union contracts. Most records relating to the shut down facilities were either sold as a part of the sale of the facility or were destroyed in accordance with established record retention policies.

Kaiser Aluminum currently operates two facilities in the San Francisco Bay Area:

- 1. Kaiser Center, Inc. (Management of 1960 to Present 300 Lakeside Drive Ofice Building)
 Oakland, CA 94643
- 2. Kaiser Aluminum Center for Technology 1969 to Present 6177 Sunol Boulevard Pleasanton, CA 94566

We have been unable to locate any records or documents regarding any relationship between any of the Kaiser Aluminum facilities listed above and the Bay Area Drum Site or the companies that operated the Site during the period 1948 through 1987.

A preliminary review of the limited records at the Permanente facility has failed to disclose any relevant documents. The caretaker employee assigned to the Permanente facility is presently on temporary assignment at Pryor, Oklahoma. When he returns we will have him continue the search of records at that facility and will supplement this response if any relevant documents are located. Kaiser Aluminum's Corporate Environmental Affairs Office in Baton Rouge, LA has located two shipping documents indicating the sale of drums to Myers Container Corporation, 6549 San Pablo Avenue, Oakland CA 94608, on March 31, 1986 and September 2, 1986 by the Electical Products Plant at San Leandro. Copies of these documents are attached as Exhibit A. We understand that Myers Container Corporation may be a successor to Myers Drum or related to Myers Drum in some way.

A review of records at the Center for Technology in Pleasanton indicates two shipments of drums to Myers Container Corporation at the Oakland address noted above on May 10, 1989 and July 13, 1989. Copies of the shipping orders are attached as Exhibit B.

Following receipt of your letter of March 9, 1993 we were contacted by Joseph J. Armao, Esq. of Heller Ehrman White & McAuliffe, common counsel to an existing group of PRPs for the Bay Area Drum Site, and invited to join the group. Without admitting any liability with respect to the Site, we have signed the Bay Area Drum Facility Participation Agreement and paid the initial assessment. We intend to participate with the PRP Group provided that the evidence reasonably demonstrates that Kaiser Aluminum is a responsible party.

As noted above, we will continue our review of existing records and will update this response if any relevant documents are located. In the meantime I would appreciate it if you would furnish me with copies of documents in your possession that tie Kaiser Aluminum to the Site or, in the alternative, advise me where such documents are located and can be inspected.

All future correspondence relating to this matter should be addressed to the undersigned. Should you have any questions, please contact the undersigned at (510)271-5603.

As requested, enclosed is a duplicate copy of this response.

Sincerely yours,

Charles B. Brown

Assistant General Counsel

EXHIBIT B

DEPARTMENT OF TOXIC SUBSTANCES CONTROL

REGION 2 700 HEINZ AVE., SUITE 200 BERKELEY, CA 94710-2737

March 9, 1993

Ms. Chris Laszcz-Davis Environmental Manager Kaiser Aluminum 300 Lakeside Drive Oakland, California 94643

Dear Ms. Laszcz-Davis:

The California Environmental Protection Agency, Department of Toxic Substances Control (Department) has determined that the Bay Area Drum site, located at 1212 Thomas Avenue in San Francisco, California, has a groundwater contamination problem. Drum recycling and reconditioning activities were undertaken by several companies at the site from 1948 through 1987.

This letter is to request information regarding Kaiser Aluminum's past practices and business relationship with companies that operated at the Bay Area Drum (BAD) site including: Bedini Steel Drum, San Francisco Steel Drum, Myers Drum, Waymire Drum, and Bay Area Drum Company. We are requesting information from companies who did business with any of the site operators who operated at the BAD site. Information obtained as a result of the Department's investigation indicates your company sent drums to the BAD site for reconditioning and/or disposal. Consequently, the Department has identified Kaiser Aluminum as a Potentially Responsible Party (PRP) as defined in Section Pursuant to the authority of Health & Safety Code 25323.5(a). (H&SC) Sections 25185.6, 25358.1 and 25358.3, the Department requests that you provide all information currently known or available to you, as requested below, within 30 calendar days of this letter. Please provide an original and one copy to:

Monica Gan
Department of Toxic Substances Control
700 Heinz Avenue, Suite 200
Berkeley, California 94710-2737

- 1) The approximate number of drums shipped to the BAD site between 1948 and 1987.
- 2) The nature of the substances contained in the drums, including chemical composition and concentration.
- 3) The type and capacity of each drum.

- The disposition of subject drums after the substances were 4) used.
- The residual level in each drum after they were shipped 5) off-site.
- Methods used to determine the residual levels in each drum. 6)
- 7) Purpose of drums sent to the site, i.e., drum reconditioning, sales or disposal.

Compliance with the information request set forth mandatory, pursuant to Sections 25185.6, 25358.1 and 25358.3 of the California Health & Safety Code. Failure to respond fully and truthfully to the information request may result in enforcement action by the Department, subject to the penalties allowed under Sections 25189, 25189.2, 25191 and 25367 of the Health & Safety Code. The penalty provided is up to \$25,000 for each violation and up to \$25,000 per day for each day that the violation continues. Please be further advised that provision of false, fictitious or fraudulent statements or representations may subject you to criminal penalties.

Thank you for your cooperation in this matter. If you have any questions relating to this request, please contact Susan Bertken, Senior Staff Attorney at (408) 429-0113 or Monica Gan, Analyst at (510) 540-3767.

Sincerely,

Barbara J. Cook, P.E., Chief Site Mitigation Branch
